

# Electronic Phase Comparator EPV

The **EPV electronic phase comparator** allows phase comparison at interfaces and measuring points. It can be used for the HR system as well as the LRM system. At the same time, it also allows checks for absence of voltage and tests on the interface.

## Technical description:

- Integrated test leads
- Touch-safe testing
- Function test and battery check with integrated self-test
- Clear voltage indication by LEDs
- Active phase balance indication by two coloured LEDs
- Integrated safety function and interface control
- Manual or automatic shutdown of the device

## Included in the scope of delivery:

- Two-pole adapter **827 217 002** for LRM system
- Carrying bag **364 889 001**
